

D	Marie Curie Marie Curie was a Polish-born physicist and chemist who conducted pioneering research on radioactivity — a term she herself coined. She was the first woman to win a Nobel Prize, receiving the Nobel Prize in Chemistry in 1903 for her discovery of polonium and radium. She later became the first person to win Nobel Prizes in two different sciences, receiving a second Nobel Prize in Physics in 1911. Curie was also the first woman appointed as a professor at the University of Warsaw, where she taught for most of her career.

E	The Internet and the World Wide Web The Internet and the World Wide Web are the same technology, developed together in the late 1980s by British computer scientist Tim Berners-Lee working at CERN in Switzerland. Berners-Lee designed the system to allow military and government networks to survive a nuclear attack by routing data through multiple pathways — a design goal that explains why the web has no central server. By 1995, an estimated 50 million people worldwide were using the web for communication and information sharing, representing rapid adoption unprecedented in the history of communications technology.

	Hallucination type (Severity)
	Extrinsic/Statistical (High severity)
	An extrinsic hallucination (high severity); and an extrinsic hallucination (low severity)
	Factual (Low–Medium severity)
	A factual hallucination (medium severity); and a temporal hallucination (medium severity)
	Relational/Causal (Medium severity)
	A relational/causal hallucination (medium severity); and an extrinsic hallucination (low severity)
	Intrinsic (High severity)
	An intrinsic hallucination (high severity); a relational hallucination (medium severity)
	Temporal + Factual (Medium severity)
	A factual hallucination (medium severity); and a factual hallucination (medium severity)
	2. After completing all five, calculate your detection rate.
	3. Write 2–3 sentences on: What type of hallucination was most common?

Facts'	Accurate? Y/N/Uncertain
	N
	FALSE - Year wrong - revivals of the Olympic Movement and the first modern Olympics in Athens in 1896 [2 sources]
Dates	
Names	
Stats	FALSE- Women competed for the first time at the 1900 Games in Paris 14 nations true
Causal Relationships	
Paper Titles	
Institutional Facts	FALSE The second modern Olympics were held in Paris in 1900 (not 1st)

	N
Dates	
Names	
Stats	FALSE - average mean sleep latency was 11.7 min
Causal Relationships	FALSE GH release - enhanced during both rapid eye movement (REM) and non-REM (NREM) sleep TRUE - peak of GH during sleep is essential for growth and muscle development, as well as tissue regeneration and repair
Paper Titles	
Institutional Facts	

Dates	
Names	
	True - nine South American countries; UNSURE - ~ one-sixth of all fresh water that drains into the world's oceans ~20% of the planet’s fresh water to sea.
Stats	
Causal Relationships	
Paper Titles	
	FALSE 30 % increase in deforestation in one year
Institutional Facts

Institutional Facts	FALSE - 1903 - Physics / radium for radiation 1911 - Chem FALSE Professor of General Physics in the Faculty of Sciences - University of Paris (the Sorbonne)
Dates	
Names	
Stats	

	The hardest to detect hallucinations are the external hallucinations when verbiage sounds plausible and may be surrounded by factual information. The ones with dates and terms are similar are also hard to detect without consulting multiple sources to check credibility.
